Industry employment can be aggregated into goods producing and non-goods producing. The Southwest region is similar to other regions in having more employment in non-goods producing industries than in the goods producing group. Goods producing industries include manufacturing, construction, mining, agriculture, forestry and fishing. Non-goods producing industries include trade, services, government, transportation, communications, and utilities, and finance, insurance and real estate. Graph 6 offers a reflection of this trend.

Job openings are created in two ways: through new jobs (job growth) and through replacements. Replacements occur when an individual leaves an occupation. For example, a waiter graduates from college and takes a job as an accountant, or a beautician decides to sell cars. From a job seeker's point of view, there may not be much difference between the two, since both create a job opening. However, only occupational growth means that there are more jobs than there used to be. Table 52 shows the top 10 occupations projected to grow the most over the next 10 years.

High Demand Occupations

High demand occupations are those having at least 5,000 total job openings. These openings include both those resulting from growth and those resulting from replacements. There are no high demand occupations for the Southwest region.

Fast Growing Occupations

Occupations adding the most jobs are not necessarily the occupations experiencing the fastest growth. Fast growing occupations are defined as those growing by at least 28.6 percent (two times the average statewide growth rate of 14.3 percent for all occupations) and having employment of 1,000 or more in 2010.

Declining Occupations

Declining occupations are defined as those projected to have at least 1,000 jobs in 2010, but a decrease in employment from 2000 to 2010.
